4. FIRST AID MEASURES**Eye Contact**

Hold eyes open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.

Skin Contact

Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice.

Inhalation

Move to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Ingestion

Call a physician or poison control center immediately. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

Most important symptoms and effects, both acute and delayed

Symptoms of poisoning may occur after several hours; therefore medical observation for at least 48 hours after the accident is warranted.

Indication of immediate medical attention and special treatment needed, if necessary

Treatment is symptomatic and supportive. Show this material safety data sheet to the doctor in attendance.

5. FIRE-FIGHTING MEASURES

Suitable Extinguishing Media	Dry chemical, carbon dioxide, water spray or regular foam. Cool containers with flooding quantities of water until well after fire is out. Dike fire control water for later disposal; do not scatter the material.
Unsuitable extinguishing media	Do not scatter spilled material with high pressure water streams.
Specific Hazards Arising from the Chemical	Dust may form explosive mixture in air. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Burning chemicals may produce by-products more toxic than the original material.
Explosion data	
Sensitivity to Mechanical Impact	No information available.
Sensitivity to Static Discharge	Static electricity might be sufficient to ignite dust clouds. Possibility of ignition will depend on the minimum ignition energy (MIE) and the type of operations undertaken with the material. MIE values are not provided in this SDS.
Protective equipment and precautions for firefighters	As in any fire, wear self-contained breathing apparatus and full protective gear. Isolate fire area. Evaluate upwind.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions	Evacuate non-essential personnel. Keep people away from and upwind of spill/leak. Isolate and post spill area. Avoid dust formation. Do not breathe dust. Ensure adequate ventilation. Remove all sources of ignition. Wear suitable protective clothing, gloves and eye/face protection. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. For personal protection see section 8.
Other	For further clean-up instructions, call FMC Emergency Hotline number listed in Section 1 "Product and Company Identification" above.
Environmental Precautions	Keep people and animals away from and upwind of spill/leak. Keep material out of lakes, streams, ponds, and sewer drains. Keep out of waterways.
Methods for Containment	Prevent further leakage or spillage if safe to do so. Dike far ahead of spill to collect runoff water. Cover powder spill with plastic sheet or tarp to minimize spreading and keep powder dry. Contain and collect spillage with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see Section 13).
Methods for cleaning up	Use clean non-sparking tools to collect material and place it into loosely covered plastic containers for later disposal. Contain and collect spillage with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local/national regulations (see Section 13).

7. HANDLING AND STORAGE

Handling	Ensure adequate ventilation. Avoid dust formation. Handle in accordance with good industrial hygiene and safety practice. Wash hands before eating, drinking, chewing gum, using tobacco, or using toilet. Do not contaminate other pesticides, fertilizers, water, food, or feed by storage or disposal. Wash thoroughly after handling. Use protective gloves made of chemical materials such as nitrile or neoprene. Wash the outside of gloves with soap and water before reuse. Check regularly for leaks.
Storage	Store at 0° - 30 °C. Keep away from open flames, hot surfaces and sources of ignition. Keep container tightly closed in a dry and well-ventilated place. Avoid contact with water or humidity. Keep away from direct sunlight. Keep out of reach of children and animals.
Incompatible products	Strong acids, strong bases
